Good Afternoon [Personal Matters / Ex. 6]

Thank you for your most recent message. I hope that my message finds you and your family doing somewhat better.

I would like to personally apologize to you – as I realize that it must be extremely frustrating & quite confusing in attempting to deal with & resolve significant issues when more than one State or Federal Government Regulatory or Public Health Agency is involved - or has overlapping jurisdictions.

Please rest assured that I have in fact, received & read all of the electronic messages that you have sent to me. However, I have been directed by my supervisors to forward all of your messages to a single point of individual contact here in our San Francisco Regional Office.

As a result, all of your messages have been concurrently & directly forwarded to the **Associate Director of our Superfund Division – Ms. Angeles Herrera**. Ms. Herrera is part of the EPA Superfund Program's Senior Management Team & is the Senior Official in our regional office designated to manage & respond to individuals with questions or issues regarding the Hickam Air Force Base remedial efforts. I know that Ms. Herrera has been in direct contact with Ms. Fenix Grange at HDOH regarding your concerns.

Ms. Herrera can be reached directly at 415.972.3144 or electronically at: Herrera.Angeles@epa.gov

Please understand that U.S. EPA endeavors to establish a single point of individual contact in situations such as yours, and Ms. Herrera is the Senior Official within our regional office with both the authority & responsibility at this particular site – both of which exceed my own.

While I do apologize [Personal Matters / Ex. 6] please do not hesitate to send or articulate your concerns directly with Ms. Herrera.

Continued Kind Regards...

Personal Matters / Ex. 6

Mr Wilson, I know you are very busy and if I need to address this with another person in the EPA I would appreciate it if you could please give me a contact. We just retested the indoor air of our home attached are the results. We are being relocated back to the mainland due to the medical issues our family is suffering, since the medical community here has not been able to find a cause and we have been exposed to these gases for the last 5 years of living here. SOMEONE need to help the residents of Hickam communities....there are other homes that have tested positive ours is the only one that has had multiple tests showing the fluctuations. These readings are higher then our original readings for Heptachlor and it is not even the hottest part of the year here yet. If there is someone else I should be contacting for this...please tell me. Thank you

According to the State of Hawaii only heptachlor was used to treat some homes. See the last paragraph of the file below under Heptachlor.

<http://eha-web.doh.hawaii.gov/eha-cma/Downloads/HEER/termitecidefactsheetfinalsept2011.pdf>

Please see attached results.

Note: Detected large unknow peaks with retention times below that of heptachlor for both samples.

Best,

Dr. Cassidy

LaDean

Good Morning

Personal Matters / Ex. 6

Your question or inquiry to the “EPA Information Contact Form” regarding health-based action levels for several pesticide compounds has been referred to my office. I just attempted to phone you directly via the contact information provided

Personal Matters / Ex. 6

Please feel free to contact me directly via the contact information provided below. I would be happy to speak with you about various environmental screening action levels & their derivation. For your convenience, U.S. EPA’s health-based Regional Screening Levels (RSLs) can be found at:

http://www.epa.gov/reg3hwmd/risk/human/rb-concentration_table/Generic_Tables/docs/master_sl_table_run_JAN2015.pdf

Best Regards...
